

SafeSpot™

COLLISION AVOIDANCE SYSTEM

A new, wireless collision avoidance system - SafeSpot™ reduces accidents in the workplace. Forklift accidents cost an estimated \$3.7 billion per year in the U.S. and are the cause of 34,900 serious injuries annually including 85 deaths. SafeSpot™ offers a simple, inexpensive solution that increases safety while ensuring OSHA compliance.

BENEFITS

- Increases warning time and reduces injuries
- Installs easily
- Requires no maintenance
- Eliminates the need for workers to wear tags
- Works non-line-of-sight; around corners with no blind spots or coverage gaps
- Operates in high temperatures where PIR sensors fail
- Provides strong return on investment
- Optional audible alarm

HOW IT WORKS
